

Human skeletal muscle troponin T (skTnT)

Product Summary

Source:

Human skeletal muscle.

Blood sample from the tissue donor was tested and found negative for HBsAg, HIV-1 and HIV-2 antibodies, HCV, and syphilis.

Applications:

Immunogen for antibody production, troponin biochemical and immunochemical studies.

Analysis:

Purity more than 95 % (SDS-PAGE).

Protein content determined by the Lowry procedure.

Immunological identity confirmed by reaction with monoclonal antibody that is specific for the TnT skeletal muscle isoform.

Presentation:

Lyophilized from protein solution in 0.01 M HCl.

Storage Conditions:

-20 °C (between -15 and -30 °C allowed)

-70 °C for long term storage (between -65 and -80 °C allowed)

Material Safety Note:

This product is sold for research use only. Standard Laboratory Practices should be followed when handling this material.
