

Monoclonal mouse anti-human fatty acid binding protein (FABP)

Product Summary

MAbs:

5B5, 10E1

New MAbs: 22, 25, 30, 31

Hybridoma clones have been derived from hybridization of Sp2/0 myeloma cells with spleen cells of Balb/c mice immunized with human heart FABP.

Specificity:

Human heart FABP

MAb Isotypes:

IgG1 for MAbs 5B5, 10E1, 22, 25, 30, 31 IgG2b for MAbs

Applications:

Human heart fatty acid binding protein immunoassay and immunoaffinity purification. All MAbs are working in ELISA.

We recommend using following pairs of antibodies for sandwich immunoassay (capture-detection):

10E1 - 5B5, 22 - 25

MAbs 22, 30 and 31 are recommended for use in Western blotting.

Purification:

Chromatography on protein A Sepharose

Presentation:

PBS, pH 7.4, 0.1 % sodium azide (NaN₃)

Storage Conditions:

+ 4 °C

Material safety note:

This product is sold as an antibody preparation for research use only. Standard Laboratory Practices should be followed when handling this material.

Contains sodium azide (0.1 %) as preservative. Although the amount of sodium azide is very small appropriate care must be taken when handling this product.
