

Myoglobin free serum

Product Summary

Source:

Pooled normal human serum. Blood samples from donors were tested and found to be negative for HBsAg, HIV-1 and HIV-2 antibodies, and HCV.

Applications:

Myoglobin free serum can be used for preparation of human myoglobin standards and calibrators.

Analysis:

According to ELISA testing myoglobin free serum does not contain more than 1 ng/ml of human myoglobin.

Purification:

Immunoaffinity chromatography of pooled normal human serum.

Gel for affinity column was prepared by coupling anti-myoglobin monoclonal antibodies (several monoclonal antibodies specific to the N-terminal, C-terminal and central parts of myoglobin molecule) with BrCN-activated Sepharose CL 4B.

Presentation:

Frozen liquid.

Storage Conditions:

-20 °C (between -15 and -30 °C allowed)

Material Safety Note:

This product is sold for research use only. Standard Laboratory Practices should be followed when handling this material.
