

Retinol-binding protein 4 (RBP4) from human plasma, free form

Product Summary

Source:

Pooled human plasma.

Donor blood samples were tested and found negative for HBsAg, HIV-1 and HIV-2 antibodies, and HCV.

Applications:

Calibrator in immunoassays

Analysis:

Purity > 95 % (SDS-PAGE)

Immunological activity:

Immunoreactivity is checked using monoclonal antibodies specific to RBP4

Purification:

Affinity chromatography and size-exclusion chromatography

Presentation:

Lyophilized from phosphate-buffered saline (10 mM K-phosphate, pH 7.4, 150 mM NaCl).

Product is recommended to reconstitute with deionised water.

Storage Conditions:

-20 °C (between -15 and -30 °C allowed)

Material safety note:

This product is sold for research use only. Standard Laboratory Practices should be followed when handling this material.
